BIZFLOW

The Minor Project-II report submitted to
Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal
towards partial fulfillment of the Degree of
Bachelor of Technology
in
Computer Science & Engineering

Guided by
Prof. Mayank Shrivastava

Submitted by
Varun Pawar |0873CS231133
Vansh Devda |0873CS231132

Department of Computer Science & Engineering
Sri Aurobindo Institute of Technology,
Indore(M.P.) 2025-2026

SRI AUROBINDO INSTITUTE OF TECHNOLOGY, INDORE

RECOMMENDATION

This is to certify that Mr. Varun Pawar (0873CS231133), & Mr. Vansh Devda (0873CS231132) students of B.Tech. VI Semester in the year 2025-26 Department of Computer Science & Engineering of this institute has completed their work on “***BIZFLOW***” for Minor Project-II based on syllabus and has submitted a satisfactory account of their work in this report which is recommended for the partial fulfillment of the degree of Bachelor of Technology in Computer Science & Engineering.

INDORE**

CERTIFICATE

This is to certify that the work embodied in this project entitled “ ***BIZFLOW***” being submitted by Mr. Varun Pawar(0873CS231133), & Mr. Vansh Devda (0873CS231132), students of B.Tech. VI semester, Computer Science & Engineering Department in the year 2025-26, is a satisfactory account of their work based on syllabus which is accepted in partial fulfillment of degree of Bachelor of Technology in Computer Science & Engineering.

INTERNAL EXAMINER

Date

SRI AUROBINDO INSTITUTE OF TECHNOLOGY, INDORE

DECLARATION

We hereby declare that the Project entitled **“BIZFLOW”** is our own work conducted under the supervision of **Prof. Mayank Shrivastava**, Assistant Professor, Department of Computer Science & Engineering at **Sri Aurobindo Institute of Technology, Indore, M.P.**

We further declare that to the best of our knowledge this report does not contain any part of work that has been submitted for the award of any degree either in this institute or in other institute without proper citation.

Varun Pawar 0873CS231133

Vansh Devda 0873CS231132

ACKNOWLEDGMENT

We express deep gratitude for enthusiasm and valuable suggestions that we got from our guide **Prof. Mayank Shrivastava** for successful completion of the project. This project was not possible without the invaluable guidance of our project guide.

We are also thankful to our project coordinator **Prof. Kapil Bhardwaj**, for his technical guidance, encouragement and support.

We are deeply indebted to **Prof. Sunil Parihar**, Head, Department of Computer Science and Engineering, for providing us support and resources for successful completion of this project.

I would like to give thanks to **Dr. Aaquil Bunglowala**, Director SAIT for his valuable guidance and motivation for the completion of the work.

Finally, we are thankful to all the people who are related to the project directly or indirectly.

Varun Pawar	0873CS231133
Vansh Devda	0873CS231132

ABSTRACT

BizFlow: A Tenant-Based Distributor Inventory, Billing and Business Management System

BizFlow is a web-based business management system designed to simplify inventory control, billing operations, payment tracking, and record management for distributors and small businesses. The system is developed to replace manual registers, disconnected spreadsheets, and paper-based invoicing with a unified digital platform that improves accuracy, speed, and usability. It supports a tenant-first workflow in which each company maintains isolated users, products, invoices, inventory, and payments.

The application provides core modules such as authentication and onboarding, dashboard analytics, product catalog management, inventory management, invoice generation, and bill history viewing. Bills can be created as stock_in or stock_out transactions, and the system automatically updates inventory according to the invoice type. Each invoice stores line-item details such as quantity, rate, tax, discount, subtotal, grand total, and pending amount, allowing the system to track bill state accurately as pending, partial, or paid.

BizFlow also supports professional PDF invoice generation and downloadable bill records for easy sharing and archival. The frontend is built with React and Vite, using React Query for server-state handling and protected routes for secure session-based access. The backend is designed around tenant-scoped data isolation, transaction safety, and concurrency control, ensuring reliable invoice numbering, stock updates, and payment posting.

The project demonstrates how a focused, modern web application can streamline day-to-day distributor operations while remaining scalable for future enhancements such as Google authentication, role-based access control, advanced analytics, and broader business automation.

TABLE OF CONTENT

COVER PAGE	I
FRONT PAGE	II
RECOMMENDATION	III

List of Abbreviations :-

Abbreviation	Full Form
B.Tech	Bachelor of Technology
DFD	Data flow diagram
E-R	Entity Relationship
UI	User Interface
JSON	JavaScript object notation
API	Application programming interface

List of Symbols :-

Symbol	Description
→	Flow of process
⇌	Data exchange
{ }	Data block / structured data
=	Assignment or equality

Nomenclature ;-

Term	Description
Supabase	Backend solution providing postres database used for development.
GenerateBill	One of the Screens that gives UI for CRUD bills
