SRI AUROBINDO INSTITUTE OF TECHNOLOGY, INDORE

CONTENTS

S.No.	Date of Experiment	Name of Experiment	Page No.	Date of Submission	Remark
1		To study various communication media used in computer networks and understand the structure and working of straight-through and cross-wired Ethernet cables.			
2		To study different types of networks devices – Routers, Switches, Hub, Bridge, Repeater, gateway how they work and where are they used.			
3		To study basics networking commands.			
4		Configure and implement a network using Packet Tracer. Creating a First Network.			
5		Configure network devices, such as hubs and switches within a network topology using Packet Tracer software.			
6		Configure network topology and implement static routing using Packet Tracer Software.			
7		Configure network topology and implement dynamic routing protocol such as RIP, OSPF etc. using Packet Tracer.			
8		Configure DHCP Server in the Network using Packet Tracer software.			
9		Configure network topology to implement VLANs with trunking using Packet Tracer.			
10		Configure network topology and implement dynamic routing protocol such as RIP using Packet Tracer.
