CONTENTS

S. No.	Date of Experiment	Name of Experiment	Page No.	Date of Submission	Remarks
1	13-2-26	Implementation of matrix multiplication and linear algebra operations using Numpy.	01	27-2-26	
2	20-2-26	Statistical Data Analysis calculating mean, median and mode using Numpy and Scipy.	02	27-2-26	
3	27-2-26	Introduction to Data visualization plotting Basic linear trends.	03	27-2-26	
4	6-3-26	Time-Series visualization customizing line plots for weekly trends.	04	3-4-26	
5	20-3-26	Correlation analysis creating scatter plots to visualize relationships.	05	3-4-26	
6	3-4-26	Distribution analysis: Generating Histograms and modeling normal.	06	17-4-26

S. No.	Date of Experiment	Name of Experiment	Page No.	Date of Submission	Remarks
7	10-4-26	Comparative Analysis: Visualizing Categorical Data using Bar charts.	07	17-4-26	
8	10-4-26	Comparative Analysis: visualizing categorical Data using Bar charts.	08	17-4-26	
9	17-4-26	Binary classification using logistic regression for probability-Based Outcomes.	09	1-5-26	
10	24-4-26	Data preprocessing Implementing train-test split for model Evaluation.	10	1-5-26	
11	24-4-26	Classification using support vector machines (svm) with linear kernels.	11	1-5-26	
12	1-5-26	Model Evaluation matrix performance assessment using the confusion Matrix.	12	8-5-26
